

PRODUCT BRIEF

INNOVAMED
aesthetics

WHO WE ARE

InnovaMed Aesthetics was established in 2023 as a division of RehaCare Pty Ltd.

Established in 2014, RehaCare is a leading distributor of rehabilitation & surgical specialty products with innovative healthcare technology solutions that improve the independence and quality of life for people with injuries and disabilities.

At InnovaMed Aesthetics:

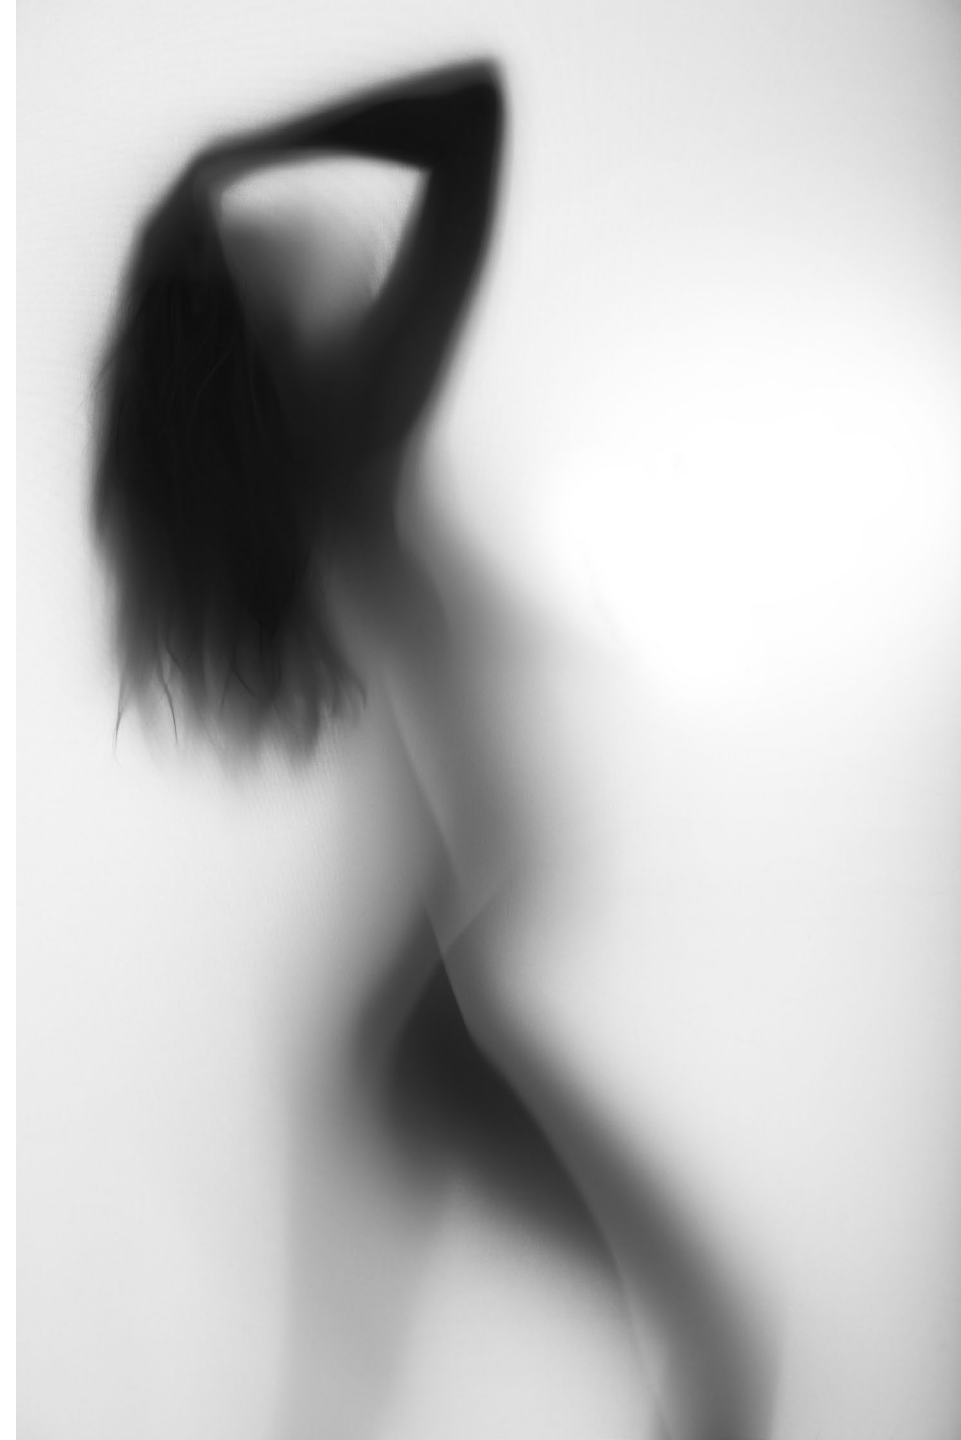

- Our purpose is to provide safe cutting-edge medical solutions to improve the quality of life for people with aesthetic needs.
- Our vision is to be the leading distributor of Aesthetic advancements in Australia and New Zealand.

OUR MARKET

NON-SURGICAL FAT REDUCTION

- While facial treatments have long dominated the market, practitioners all over the world are tipping the body as the new frontier for growth and innovation.
- According to research, two-thirds of people globally report negative associations with their body shape.
- The appetite for aesthetic body treatments is on the rise. For instance, the number of non-invasive fat reduction procedures grew by 21.1% between 2019 and 2020 globally.
- More recently, demand for these treatments looks positive, with worldwide growth for non-invasive energy-based device treatments, non-invasive fat reduction procedures set to grow in volume by 15.2% (2020-2025).

COMMITMENT TO QUALITY

WITH OUR FLAGSHIP PRODUCT EMERALD LASER BY ERCHONIA

- For 24 years Erchonia has been committed to the research of low-level laser therapy through extensive clinical studies
- 20 FDA Market Clearances backed by Level 1 Clinical Studies, 6 in Fat Loss
- 1st Low Level Laser to receive FDA Clearance- Neck & Shoulder Pain
- Created a new category for the FDA called OLI-Fat Reduction Laser, making Erchonia the gold standard for low level laser technology

CORE PRODUCT RANGE

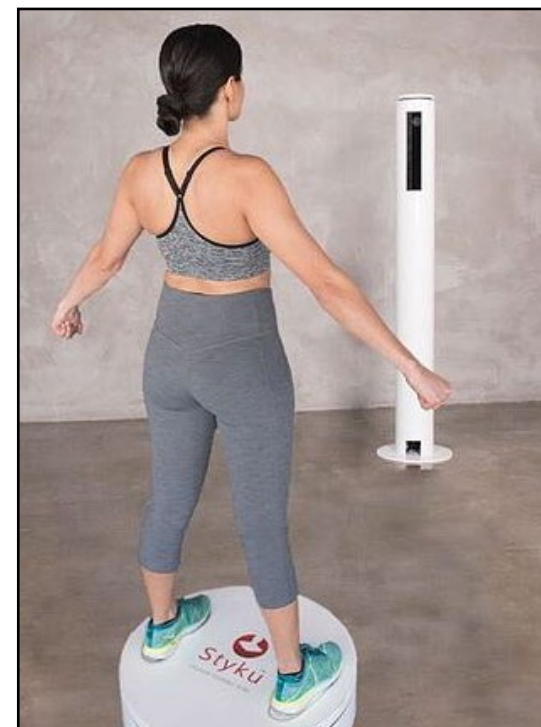

EMERALD LASER

The world's first diode laser (LLLT) for non-invasive fat reduction.

BALLANCER PRO

The world's most advanced compression therapy system providing medical-grade lymphatic drainage massage.

STYKU

Pioneer in 3D Body Scanning technology.

EMERALD™

LASER

Emerald Laser is the world's first diode laser (LLLT) for non-invasive fat reduction scientifically proven to be the most effective and healthiest treatment for fat & cellulite reduction, and body contouring.

- Winner of 'Best Aesthetic Technology 2022' in the prestigious Safety in Beauty Awards
- TGA listed & FDA cleared to treat patients with up to 40 BMI
- Proven results with average circumferential reduction of 6 inches
- No downtime, no pain and no side-effects, during or after treatments
- Completely unattended treatments
- A non-invasive low level laser that emits (10) 532 nm green lasers onto the skin to treat hypertrophic adipocytes.
- The treatment emulsifies the adipose tissue and releases excess fatty materials into the interstitial space
- The fat is passed through the body during its natural course of detoxification through the lymphatic system
- Treatment time of 30mins, 1-2 times a week
- Plethora of health & wellness benefits

Ballancer®

PLATINUM

Ballancer® is clinically proven to speed up muscle recovery and flush the lymphatic system. It is the leading medical grade compression therapy system across Europe.

- FDA cleared for relieving muscular pain and aches and enhancing circulation
- 2 high quality garments for upper & lower body garments with 24 chambers each
- Sensor-controlled, completely adjustable, graduated pressure at maximum 80 mmHg
- The only device with built-in 'Pretreatment'-mode to open up lymphatic pathways
- 4 different sequential, peristaltic treatment modes
- 1 session instantly flushes out toxins, lactic acid and metabolic waste products from exercise and physical activity
- 1 session immediately reduces delayed muscle soreness and resting time before the next physical activity or work out
- Highly improves circulation and breaks down adhesions while nourishing the tissue with freshly oxygenated blood
- Regular treatment sessions shorten healing time after trauma or sports injury - significantly improves swelling and edema
